Welcome to the team

GKN partnership with Panasonic Jaguar Racing in Formula E:

Formula E is the pinnacle of electric motorsport, where single-seater all-electric racecars battle it out on narrow city center street circuits.

As an Official Partner of the Panasonic Jaguar Racing team, GKN will be developing powertrain technology over future seasons of the championship.

We are the global leader in high-performance drivetrain systems for electric vehicles, which perfectly positions us to make a real impact in Formula E.
